МАТЕМАТИЧЕСКИЕ КАРТОЧКИ
ДЛЯ СОВЕРШЕНСТВОВАНИЯ ВЫЧИСЛИТЕЛЬНЫХ НАВЫКОВ
ДЛЯ ОБУЧАЮЩИХСЯ 2 КЛАССОВ И УЧИТЕЛЕЙ НАЧАЛЬНЫХ КЛАССОВ
Сборник дидактических материалов

Тирасполь
2025

ББК 22.1
М34

Одобрено Учебно-методическим советом ГОУ ДПО «ИРОиПК»
(протокол от 23.06.2025 г. № 01)

Составитель

О.А. Пустовая, учитель начальных классов МОУ «Ближнехуторская средняя общеобразовательная школа».

Рецензенты:

Н.Я. Свирина, руководитель районного методического объединения учителей начальных классов Слободзейского района, учитель начальных классов высш. квалиф. категории МОУ «Терновская русско-молдавская средняя общеобразовательная школа»;

Л.С. Недоступ, директор высш. квалиф. категории, учитель начальных классов первой квалиф. категории МОУ «Ближнехуторская средняя общеобразовательная школа».

Математические карточки для совершенствования вычислительных навыков для обучающихся 2 классов и учителей
М34 начальных классов: *сборник дидактич. материалов* / сост. О.А. Пустовая. – Тирасполь: ГОУ ДПО «ИРОиПК», 2025. – 30 с.

ББК 22.1

ПОЯСНИТЕЛЬНАЯ ЗАПИСКА

При переходе в среднее звено выпускники начальной школы часто встречаются с проблемами в дальнейшем изучении учебного предмета «Математика». Происходит это из-за того, что у ребят не достаточно хорошо сформированы вычислительные навыки и поэтому происходит замедленное и затрудненное восприятие нового материала.

Чтобы избежать этого, необходимо в начальной школе тщательнее отрабатывать автоматизм вычислительных процессов, чтобы на вычисления у ребят уходило минимальное количество времени. Для этого целесообразно ежедневно уделять 7–10 минут работе с вычислительными навыками. Лучше всего такую работу проводить с выражениями, записанными на небольших карточках. Опыт показал, что удобнее использовать такой вариант для распечатки карточек: альбомная ориентация листа, узкие поля, 3 колонки, в каждой колонке одинаковые выражения, двусторонняя печать. Таким образом, на одном листе можно напечатать карточки сразу для трех учеников на всю неделю. Изменяя числа в выражениях, создаем второй вариант карточек. Предложенные карточки оптимального размера, так как их удобно и решать ребятам, и проверять учителю, а также, что немаловажно, экономно используется бумага для печати.

Для более эффективного результата работа с карточками должна войти в систему, так как решать их от случая к случаю ввиду того, что не будет видна четкая цель – научиться хорошо считать, чтобы успевать за отведенное время верно выполнить все задание. У учителя, таким образом, есть возможность ежедневного контроля знаний всех обучающихся и своевременного обнаружения пробелов в конкретной теме.

Работа с карточками для автоматизации вычислительных навыков требует от учителя большого труда и при их подготовке, и при их проверке. Удобнее распечатывать карточки заблаговременно: если приготовить их на несколько недель вперед, есть вероятность, что появится необходимость больше времени уделить какой-то теме или что-то дополнительно еще проработать. В карточках можно указывать дату над каждым столбиком примеров. Проверять необходимо каждый столбик примеров именно в тот день, когда ребенок его решал. Оценку за карточку можно выставлять в дневник отдельно, также учитывать ее при выставлении отметки за работу на уроке. Несомненно, самостоятельное решение 25–30 выражений в карточке значит много больше, чем 2–3 выражений, решенных на уроке у доски, зачастую с подсказками учителя или других учеников. В конце учебной недели можно раздать ребятам карточки для работы над ошибками, а также для того, чтобы показать родителям.

Во 2-ом классе ребята отрабатывают навыки сложения и вычитания многозначных чисел, знакомятся с таблицей умножения некоторых чисел. В данном сборнике предложены материалы и для повторения изученного в 1-ом классе состава чисел первого десятка в виде любимых детьми «домиков» и примеров.

Карточки, которые помогут ребятам лучше усвоить сложение однозначных чисел с переходом в другой разряд, основаны на умении раскладывать число на 2 удобных слагаемых, а также на знании состава чисел второго десятка.

Необходимо научить ребят, что при сложении и вычитании многозначных чисел работу всегда начинаем с разряда единиц, а затем переходим к разряду десятков. При работе с двузначными числами удобно выделять цветными карандашами разряд единиц (синим цветом) и разряд десятков (красным цветом), а затем пользоваться такими же цветными «ниточками», которые соединяют разряды при вычислениях.

При знакомстве со сложением и вычитанием с переходом в другой разряд ребятам легче понять алгоритм работы, если ставить в числах «1», которую запоминали или занимали так, чтобы было видно двузначное число, в котором есть эта «1», а затем использовать знание состава этого числа.

В конце III четверти 2-го класса ребята знакомятся с умножением некоторых чисел. В карточках используется и переместительное свойство умножения, это помогает ребятам запоминать случаи умножения из таблицы умножения других чисел.

В IV четверти ребятам предлагаются смешанные карточки, в них есть примеры на сложение и вычитание двузначных чисел, а также примеры на умножение.

Предложенный материал, основанный на многолетнем опыте работы, может быть полезен учителям начальных классов при организации работы по совершенствованию вычислительных навыков обучающихся начальной школы как на уроках, так и во внеурочной деятельности.

СОДЕРЖАНИЕ

2 класс. III четверть

Десятичный состав чисел

Запиши число, в котором:

3 сот. 7 дес. 3 ед. =
7 сот. 2 дес. 8 ед. =
2 сот. 9 дес. 1 ед. =
5 сот. 0 дес. 7 ед. =
8 сот. 5 дес. 4 ед. =
4 сот. 6 дес. 0 ед. =
6 сот. 7 дес. 8 ед. =
1 сот. 9 дес. 0 ед. =
9 сот. 3 дес. 7 ед. =
6 сот. 0 дес. 0 ед. =
7 сот. 8 дес. 4 ед. =
9 сот. 9 дес. 2 ед. =

Запиши число в виде суммы разрядных слагаемых:

456 =
379 =
291 =
690 =
852 =
405 =
123 =
583 =
907 =
538 =
609 =
528 =

Запиши число, в котором:

7 сот. 8 дес. 4 ед. =
5 сот. 2 дес. 3 ед. =
6 сот. 0 дес. 7 ед. =
9 сот. 2 дес. 5 ед. =
7 сот. 5 дес. 1 ед. =
6 сот. 9 дес. 0 ед. =
3 сот. 5 дес. 4 ед. =
6 сот. 3 дес. 0 ед. =
8 сот. 5 дес. 7 ед. =
9 сот. 0 дес. 6 ед. =
7 сот. 0 дес. 0 ед. =
5 сот. 2 дес. 4 ед. =

Запиши число в виде суммы разрядных слагаемых:

563 =
729 =
914 =
635 =
528 =
509 =
213 =
534 =
708 =
286 =
405 =
293 =

Запиши десятичный состав числа:

368 = сот. дес. ед.
479 = сот. дес. ед.
531 = сот. дес. ед.
820 = сот. дес. ед.
903 = сот. дес. ед.
148 = сот. дес. ед.
730 = сот. дес. ед.
243 = сот. дес. ед.
356 = сот. дес. ед.
428 = сот. дес. ед.
108 = сот. дес. ед.

Сравни числа:

345 ... 435	247 ... 238
127 ... 721	652 ... 642
700 ... 699	533 ... 532
869 ... 968	456 ... 465
909 ... 912	780 ... 810
357 ... 361	518 ... 481
179 ... 183	314 ... 214
107 ... 100	248 ... 284
359 ... 361	456 ... 546
